

"ProviderGateway-LTC"

**The Medicaid Subsidy Management System
For Long Term Care**

Overview of Need

Processing subsidy transactions between Nursing Homes and State Medicaid Authority and/or its fiscal agents is an inefficient paper process that is costly and the source of constant complaints from all parties involved. It inflates administrative costs, and creates fertile ground for inadvertent errors or fraud.

The Technology Solution:

ProviderGateway - LTC is a Web-based application that:

- Automates all subsidy management transactions between Long Term Care providers and the single state Medicaid authority or its fiscal agent.
- Provides patient tracking/case load management, Nursing facility directory, information sharing, billing management, on-line reports, and ad-hoc reporting capability.
- Fully compliant with HIPAA regulations

Value to State Medicaid Authority and/or Fiscal Agent:

A) Cost savings:

- Reduce record locating time by 80%
- Reduce transaction completion time by 70%
- Eliminate follow-up correspondences and phone calls
- Eliminate mailing and faxing costs, reduce mail room costs
- Reduce error rate and resubmissions by over 60%
- Reduce supervision needed for monitoring productivity and timeliness at all points of transactions

- Cut claim examination time significantly
- Eliminate data entry (into Medicaid Legacy system; use interface)
- Reduce by at least 90% the time needed for preparing various reports
- Reduce audit cost by providing an electronic audit trail of all transactions on-line.

B) Process Improvement and Simplification:

- Improve processing time of Medicaid reimbursement
- Reduce overpayment and fraud
- Electronic processing and accurate historical records
- On-Line review and approval of claims
- Increase efficiency & accuracy in processing
- Provide accurate tracking and accountability
- Reduce errors and duplicative work
- On line recording and tracking of patient liability, level of care, client status change, and patient information
- Complete searchable directory of all Nursing Facilities
- Accelerate cash flow from the Feds to State
- Electronic access to accurate historical records
- Ability to communicate with all facilities in the network electronically

Value to Nursing Facilities:

A) Cost savings:

- Reduce record location time by 80%
- Reduce transaction completion time by 70%
- Eliminate follow-up correspondences and phone calls
- Eliminate mailing and faxing cost
- Reduce error rate and resubmissions by over 70%
- Reduce supervision needed for monitoring productivity and timeliness at all points of transactions

- Reduce by at least 90% the person power needed for preparing various reports

B) Process Improvement and Simplification:

- Accelerate cash flow to providers by Improving processing time of Medicaid reimbursement
- Instant infrastructure and database repository without any capital investment
- Electronic processing and accurate historical records
- On-Line review and approval of claims
- Increase efficiency & accuracy in processing
- Provide accurate tracking and accountability
- Error reduction and reducing duplicative work
- On line recording and tracking of patient liability, level of care, client status change, and patient information
- Complete searchable directory of all Nursing Facilities
- Easy to integrate directly into the Nursing Home's accounting system
- Check the status of transmittals instantaneously
- Electronic access to accurate historical records
- Improve reimbursement time by reducing errors in transmissions
- Ability to communicate with other facilities in the network electronically

ProviderGateway-LTC is a proven, web-based product, built on the Microsoft .NET platform, making scalability easy (State wideness) and ready for integration into legacy Medicaid systems (State MMIS).
